Dear Mr.Jamnadas Dwarakadas,

I am in receipt of your letter dated 18th November which I am passing on to the Director of Industries and Commerce for further action. From the enclosure to your letter I notice that this plant is a second hand one. But it is not stated whether it has been reconditioned thoroughly and for what period the plant was worked. Whether it includes all uptodate machines is also not clear.

If you remember I was particularly anxious that you should give the estimate of the operations costs. This has not been sent.

I dare say the Director of Industries will fix a date for your interview with your expert and write to you.

I shall certainly be happy to see you when you next come to Bangalore.

Yours sincerely,

MW.

OFFICE OF THE DIRECTOR,

Bangalore, dated 2nd Decr. *193* 5.

Dear Mr. Venkatanarappa,

Subject - Silk Waste Spinning Plant offered by Mr. Jamnadas Dwarakadas of Bombay.

With reference to your D. O. letter No. 24 dated the 29th Novr. 1935 on the above subject, I write to say that the very subject of buying the identical machinery was fully gone into last year and it was decided that it was no good going in for second-hand machinery. I doubt if any useful purpose will be served by my fixing an appointment with Mr. Jamnadas Dwarakadas to discuss the subject.

The latest report received from Messrs. Greenwood and Batley about the yield from our raw silk is very encouraging and I propose to instal this plant for our Silk Waste Factory.

Yours sincerely,
Abdul Wajid.

M. Venkatanaranappa, Esq., B.A.,
Secretary to the Government of Mysore,
Development Department, Bangalore.

III. The Plague Department will be abolished as a separate Department; and all matters relating to Plague, extensions of the Bangalore City and the Kolar Gold Fields, and Sanitary matters, that is, references from the Sanitary Commissioner and Sanitary Engineer, will be dealt with in the Local and Municipal Boards Branch under the orders of the First Councillor.

Council Resolution, dated 20th March 1901.

Abolition of the Muzrai Secretariat.

The office of the Muzrai Superintendent and Secretary to Government, Muzrai Department, is abolished. The duties appertaining to the latter will in future be performed by the Deputy Secretary to Government in the Revenue and General Departments.

2. The Deputy Commissioners of Districts, who will now have a wider control over the Muzrai Institutions in their Districts than heretofore, are expected to devote sufficient personal attention and keep them in a high state of efficiency and usefulness.

Council Resolution No. 3 of 11th August 1900.

Rules for Guidance of Secretariat.

The following rules are prescribed for the guidance of the Secretariat with a view to ensure speedy disposal of work and to prevent as much as possible accumulation of arrears :—

I. If in the matter of a case disposed of by one Member, the Secretary considers that the case in question is of such importance that it also requires the Dewan's orders, the Secretary shall, before submitting the papers to the Dewan, intimate the action he proposes to take to the Member ; and if the Member so requires, the Secretary shall, before taking action, discuss the case with him.

Proposed reference to Dewan to be intimated to Councillor.

II. Unless for special reasons which will, under the foregoing rule, be communicated to the Member in charge, every case returned by a Member to the Secretariat shall be disposed of within 48 hours. At the end of each week a list* will be sent to each Member showing what papers have not been so disposed of. Similarly, at the end of each week the Secretary will send to the Dewan and to each Member concerned, a list showing the cases pending with each of them.

* In the annexed form.

III. Unimportant cases which do not entail search for and examination of previous references shall be submitted to the Dewan or Member in charge by the Secretariat within 48 hours of their receipt. No special rule can be laid down for important work requiring consideration and reference to previous correspondence, but the Secretariat are expected to use ordinary diligence in the disposal of such cases, and on no account must a limit of one week be exceeded without a report being made to the Dewan or Member to whose portfolio the matter under reference appertains. Urgent work will, of course, be disposed of immediately, and if the delay necessary for the production of references is likely to be prejudicial, the papers are to be submitted without a note, leaving the Dewan or Member free to issue any orders urgently called for.

Arrear list for the week ending.....

Register or Serial No.	From whom, and date and number of communication.	Subject.	Remarks or explanation of the cause of delay.

NOTE.—A fresh list need not be prepared every week. The list first prepared for the week ending 18th August 1900 may be continued weekly and submitted, striking out such numbers as have been since disposed of.

Offg. Dewan's Order, 11th August 1900.

[a] Added as per Council Resolution 1 of 8th September 1900.

My dear Mr. Venkatanaranappa,

I enclose herewith the copies of the letters addressed to the Director of Industries by Dr. Isermann and myself. The reduced estimate as you will read from those letters is far below the quotations submitted to you, though I still believe that it will be a paying proposition to go in for the whole of 5,000 spindles, in which case our quotations will compare far more favourably with even the Japanese quotations. I take the liberty, therefore, of requesting you to give favourable consideration to the question of purchasing the whole plant, though, even if you decide to go in for 3,000 spindles, you will find our revised quotation far below the other quotations.

I shall be back in Bangalore in 4 or 5 days' time, when I look forward to the pleasure of seeing you and I hope we shall finally settle the matter.

With kind regards,

Yours sincerely,

Jamnadas Dwarkadas.

Bangalore, xxxxxx 21st Decr.1935.

Dear Mr. Abdul Wajid,

I beg to enclose herewith a letter addressed to you from Dr. Isermann, giving in detail the revised quotation of the Silk Twist Machinery Plant. You will find that the estimate has now been reduced from 3,37,200 to - - 2,98,500 for 3,100 spindles, which is no doubt a considerable reduction to the aggregate of Rs.38,700. There will be a simultaneous saving of duty to the extent of about Rs.4000, thus making the total reduction amount to about - - Rs.42,000. He has also given an alternative proposal for 5,000 spindles, which would amount according to the reduced estimate to Rs.3,57000, which is only Rs.20,000 more than the estimate submitted to you yesterday.

If I may be permitted to say so, I believe it will be a paying proposition to buy the whole plant of 5,000 spindles, in which case our quotations would compare much more favourably with even the Japanese quotations. Even if you were to take only 3,000 spindles, our revised quotation would be far less than the Japanese quotations.

I may also add that the spare parts

P.T.O.

which will be given for nothing are not included in the Japanese or the English quotations, the aggregate value of which alone would come to about Rs.15,000/-.

I have been able to induce Dr. Isermann to get the firm agree to this proposal, as I am very anxious that the transaction should go through

I hope, therefore, you will take into consideration all these advantages offered by us and place the order with us. From the point of view of the returns which compare favourably with the returns of the English and Japanese Machinery, inspite of deducting for depreciation on a liberal scale, I believe it will be profitable to go in for our plant. The fact that it is second hand Machinery should not be considered a bar, and becaus I understand from Dr. Isermann that the duration and the capacity for production and successful working can be guaranteed both by ourselves and the Principa

Taking all these facts into consideration, I trust it will not now be difficult for you to accept our offer.

I am proceeding to Madras tonight, but expect to be back here to finally settle the matter in 4 or 5 days' time, when I look forward to the

pleasure of seeing you again. I shall write to you from Madras and let you know the exact date of my arrival here.

With kind regards,

I am ,

Yours sincerely,

To

S. Abdul Wajid, Esq, B.A.,
Director of Industries and Commerce in Mysore,
Bangalore.

Sir,

Re. Silk Waste Plant to be installed at Channapatna.

***

I have the pleasure to refer to the several discussions during the last days together with Mr. Jamnadas Dwarkadas in your Office as well as to the meeting with the Second Member Mr. Madhava Rao and the Secretary to Government - Development Department, Mr. Venkatanaranappa , B.A., on the subject of the installation of a silk -waste plant at Chennapatna. In this connection I had submitted to you an estimate for a complete plant comprising 3000 spinning spindles and an alternate estimate for a plant with 5000 spindles and I have pointed out that the plant available from my - principals is of the larger capacity although they would - even be prepared to part with only 3000 spindles for the present.

From our discussion I have taken it that the proposition from my principals has found your approval as far as the - general outline is concerned but that you disagree with the figures for the price which you consider to be too high in comparison with the quotations you have received from compe--titors. You then have requested me to reconsider the - question of the price and if necessary to call for a revised estimate by wire from my principals. After going through all the details and considering every chance of price reduction of the various items together with Mr. Jamnadas Dwarakadas, I have sent an express wire to my principals giving an offer to them. This has not been fully accepted by them as I read from their reply received this morning but they have made a counter-proposal which seems to be fair. I sincerely hope that the following information as a result thereof will suit you so that we can proceed further in this matter without delay.

My estimate for a plant for spinning and twisting silk yarn out of charka silk waste with 3000 spinning spindles and all auxilliary machines come to ... Rs 3,37,200-0-0

DR. F. ISERMANN
ENG. D. - MECH. ENG.
CONSULTING ENGINEER
REPRESENTATIVE OF
ENGINEERING WORKS

BOMBAY.
P. O. BOX 389.
TEL. ADD:"PROCO"

which price was understood C.I.F.Madras considering the reduction granted by my principals and deduction of further such facilities which are given by the German Government in the form of scripmarks and barter -rebates this price could be re - duced,to Rs 2,98500-0-0

which would mean a reduction of Rs 38700-0-0

such reductions again would cause another reduction of the custom's duty which in this case would amount to only Rs 29850-0-0

against the amount of Rs 33720-0-0
at the previous estimate on a saving
of altogether Rs 4,2570-0-0

This plant at the value of Rs 2,98500-0-0

Would comprise the complete machinery for degumming (sufficient for a plant of 5000 spindles) dressing and combing(" " "
" " " "

Preparing sheets or laps (" " ")
spinning the silk yarn with 3100 spindles
Twisting " " 1300 "
Jasing and cleaning for the production 3100 spinning spindles
Spinning of noils
The steam boilder plant of 1080 sq.ft heating surface for 170 lbs per square inch pressure so dimensioned as to serve a plant of 5000 spinning spindles.

The total outfit of babbins, cans and sticks as well as all spare parts for the machinery in such quantities as to ensure continuous work of the machinery and without making it necessary for you to buy such parts additionally to the first supply at - least for the first 6 months after installing the Factory.

The Electric motors Ac - 3 Phase - 25 cycle-200/220 Volts of suitable number of revolutions for the individual drive of each machine, the motors with tropical insulation and of open - protected slip ring type together with rails and starters and furthermore.

The driving mechanism of Celsa -type with rubber coated ulleys for motors and machines, the efficiency being 98 -99%

The automatic humidifying plant for the main building 70x 200' area to raise the building from 30 to 82% .This plant imensioned for the plant of 5000 spindles.

The machinery for the tool room consisting of two lathes, one haping one drilling, one grinding and one milling machine ,

DR. F. ISERMANN
ENG. D. - MECH. ENG.
CONSULTING ENGINEER
REPRESENTATIVE OF
ENGINEERING WORKS

BOMBAY.
P. O. BOX 389.
TEL. ADD:"PROCO"

and the complete apparatus and machines for a testing Laboratory.

Numbers, dimensions and specifications of all these machines were given separate and need not be repeated here. I wish ,however to repeat that most of the various items are given so amply that they can serve the plant of 5000 spindles as well. If therefore our first estimate was not considered to be favourable in comparsison to those of the competitors, I beg to say that certainly the plant, comprised thereby was of ampler dimensions and further did include babbins, cans, sticks, spare -parts, change wheels and so many other accessories which can be valued at Rs 15,000-0-0 alone. After now having reduced the price as mentioned on page 2, we have done our utmost and are sure that it is considerably below any figures of competitors, always - considering the facts pointed out above.

Referring now to the original proposals of ours in submitting the estimate for a plant of 5000 spindles, I beg to report that this estimate could be revised also and the figures reduced to a - considerable extent.

The estimate came first to	Rs	3,25,000-0-0
and additionally	Rs	78,000-0-0
for auxilliary machinery and plant which meant a total of	Rs	403000-0-0
By making advantage of facilities as mentioned above, this figure - could be brought down to	Rs	3,57,000-0-0

For the complete plant C.I.F.Madras
with 5300 spinning and
2080 twisting spindles.

Babbins, sticks, cans , change wheels ,spare-parts.
Boilder plant of same size as above, electric motors and driving mechanism, humidifying plant
Coal room machinery, Apparatus for the testing laboratory,
In other words complete in every respect without the slightest item missing.

I should rather request you now to compare the figures of Rs 3,57,000/-with the one given on page 2 for theplant of 3000 spindles namely Rs 3,37,200/-(before reduction) which means that the total of the machinery comprising 5000 spindles can be supplied after the reduction of the price at a price only Rs 20,000/- higher than the plant of less capacity.

DR. F. ISERMANN
ENG. D. - MECH. ENG.
CONSULTING ENGINEER
REPRESENTATIVE OF
ENGINEERING WORKS

BOMBAY.
P. O. BOX 389.
TEL. ADD: "PROCO"

In conclusion I therefore beg to suggest that the Government of Mysore should take up this exceptionally low Offer which we could give only once. Admitting that the machines have been marked already for some time there are on the other side so many advantages which I beg to repeat in short.

A very favourable price of the whole plant of 5000 spindles as well as for 3000 spindles the plant complete in every respect assembled by a firm with a very long and wide experience, - efficient in the whole and all its parts guaranteed with regard to capacity and return by deferred payment re-erected at your place not by mere Factory Fitters but by real Expert Engineers who not only supervise the erection work but also can give - immense and invaluable assistance in the management of the Factory.

Moreover all the auxiliary machines as well as most of the preparatory machines will be absolutely New.

With regard to the terms of payment as already mentioned to you, it will be possible to utilise the blocked Reichs mark account of the Government of Mysore in Germany for the payment of parts of the second and the last instalments.

I sincerely hope that all these facts pointed out above may convince you that our proposal is the most economical one and that therefore your final decision will be made in favour of the same.

Sincerely yours,

Jamnadas Dwarkadas

Dear Mr. Abdul Wajid,

I beg to enclose herewith a letter addressed to you from Dr. Isermann, giving in detail the revised quotation of the Silk Twist Machinery Plant. You will find that the estimate has now been reduced from 3,37,200 to -- 2,98,500 for 3,100 spindles, which is no doubt a considerable reduction to the aggregate of Rs.38,700. There will be a simultaneous saving of duty to the extent of about Rs.4000, thus making the total reduction amount to about -- Rs.42,000. He has also given an alternative proposal for 5,000 spindles, which would amount according to the reduced estimate to Rs.3,57000, which is only Rs.20,000 more than the estimate submitted to you yesterday.

If I may be permitted to say so, I believe it will be a paying proposition to buy the whole plant of 5,000 spindles, in which case our quotations would compare much more favourably with even the Japanese quotations. Even if you were to take only 3,000 spindles, our revised quotation would be far less than the Japanese quotations.

I may also add that the spare parts

P.T.O.

which will be given for nothing are not included in the Japanese or the English quotations, the aggregate value of which alone would come to about Rs.15,000/-.

I have been able to induce Dr. Isermann to get the firm agree to this proposal, as I am very anxious that the transaction should go through.

I hope, therefore, you will take into consideration all these advantages offered by us and place the order with us. From the point of view of the returns which compare favourably with the returns of the English and Japanese Machinery, inspite of deducting for depreciation on a liberal scale, I believe it will be profitable to go in for our plant. The fact that it is second hand Machinery should not be considered a bar, and because I understand from Dr. Isermann that the duration and the capacity for production and successful working can be guaranteed both by ourselves and the Principals.

Taking all these facts into consideration, I trust it will not now be difficult for you to accept our offer.

I am proceeding to Madras tonight, but expect to be back here to finally settle the matter in 4 or 5 days' time, when I look forward to the

Director of Industries and Commerce in Mysore,
Bangalore.

Sir,

Re. Silk Waste Plant to be installed
at Channapatna.

***

I have the pleasure to refer to the several discussions during the last days together with Mr. Jamnadas Dwarkadas in your Office as well as to the meeting with the Second Member Mr. Madhava Rao and the Secretary to Government - Development Department, Mr. Venkatanaranappa , B.A., on the subject of the installation of a silk -waste plant at Chennapatna. In this connection I had submitted to you an estimate for a complete plant comprising 3000 spinning spindles and an alternate estimate for a plant with 5000 spindl and I have pointed out that the plant available from my - principals is of the larger capacity although they would - even be prepared to part with only 3000 spindles for the present.

From our discussion I have taken it that the proposition from my principals has found your approval as far as the - general outline is concerned but that you disagree with the figures for the price which you consider to be too high in comparison with the quotations you have received from compe--titors. You then have requested me to reconsider the - question of the price and if necessary to call for a revised estimate by wire from my principals. After going through all the details and considering every chance of price reduction of the various items together with Mr. Jamnadas Dwarakadas, I have sent an express wire to my principals giving an offer to them. This has not been fully accepted by them as I read from their reply received this morning but they have made a counter-proposal which seems to be fair. I sincerely hope that the following information as a result thereof will suit you so that we can proceed further in this matter without delay.

My estimate for a plant for spinning and twisting silk yarn out of charka silk waste with 3000 spinning spindles and all auxiliary machines came to ... Rs 3,37,200-0-0

DR. F. ISERMANN

TEL. ADD:"PROCO"

which price was understood C.I.F.Madras. Considering the reduction granted by my principals and deduction of further such facilities which are given by the German Government in the form of scripmarks and barter -rebates this price could be re - duced,to Rs 2,98500-0-0

which would mean a reduction of Rs 38700-0-0

such reductions again would cause another reduction of the custom's duty which in this case would amount to only Rs 29850-0-0

against the amount of Rs 33720-0-0
at the previous estimate and a saving
of altogether Rs 4,2570-0-0

This plant at the value of Rs 2,98500-0-0

Would comprise the complete machinery for degumming (sufficient for a plant of 5000 spindles) dressing and combing(" - " "
" " " " - - -
Preparing sheets or laps (" " ")
spinning the silk yarn with 3100 spindles
Twisting " " " 1300 "
Casing and cleaning for the production 3100 spinning spindles
Spinning of noils
The steam boiler plant of 1080 sq.ft heating surface for 170 lbs per square inch pressure so dimensioned as to serve a plant of 5000 spinning spindles.

The total outfit of bobbins, cans and sticks as well as all spare parts for the machinery in such quantities as to ensure continuous work of the machinery and without making it necessary for you to buy such parts additionally to the first supply at - least for the first 6 months after installing the Factory.

The Electric motors Ac - 3 Phase - 25 cycle-200/220 Volts of suitable number of revolutions for the individual drive of each machine, the motors with tropical insulation and of open - protected slip ring type together with rails and starters and furthermore.

The driving mechanism of Celoa -type with rubber coated pulleys for motors and machines, the efficiency being 98 -99%

The automatic humidifying plant for the main building 170x 200' area to raise the ~~building~~ humidity from 30 to 82% .This plant dimensioned for the plant of 5000 spindles.

The machinery for the tool room consisting of two lathes, one shaping , one drilling, one grinding and one milling machine ,

DR. F. ISERMANN

and the complete apparatus and machines for a testing Laboratory.

Numbers, dimensions and specifications of all these machines were given separate and need not be repeated here. I wish ,however to repeat that most of the various items are given so amply that they can serve the plant of 5000 spindles as well. If therefore our first estimate was not considered to be favourable in comparsison to those of the competitors, I beg to say that certainly the plant, comprised thereby was of ampler dimensions and further did include babbins, cans, sticks, spare -parts, change wheels and so many other accessories which can be valued at Rs 15,000-0-0 alone. After now having reduced the price as mentioned on page 2, we have done our utmost and are sure that it is considerably below any figures of competitors, always - considering the facts pointed out above.

Referring now to the original proposals of ours in submitting the estimate for a plant of 5000 spindles, I beg to report that thi estimate could be revised also and the figures reduced to a - considerable extent.

The estimate came first to	Rs	3,25,000-0-0
and additionally	Rs	78,000-0-0
for auxilliary machinery and plant which meant a total of	Rs	403000-0-0
By making advantage of facilities as mentioned above,this figure - could be brought down to	Rs	3,57,000-0-0

For the complete plant C.I.F.Madras
with 5300 spinning and
2080 twisting spindles.

Babbins, sticks, cans , change wheels ,spare-parts.
Boiler plant of same size as above, electric motors and driving mechanism, humidifying plant
Tool room machinery, Apparatus for the testing laboratory,
In other words complete in every respect without the slightest item missing.

I should rather request you now to compare the figures of Rs 3,57,000/-with the one given on page 2 for theplant of 3000 spindles namely Rs 3,37,200/-(before reduction) which means that the total of the machinery comprising 5000 spindles can be supplied after the reduction of the price at a price only Rs 20,000/- higher than the plant of less capacity.

In conclusion I therefore beg to suggest that the Governmen of Mysore should take up this exceptionally low Offer - which we could give only once. Admitting that the machines have been marked already for some time there are on the other side so many advantages which I beg to repeat in short.

A very favourable price of the whole plant of 5000 spindles as well as for 3000 spindles the plant complete in every respect assembled by a firm with a very long and wide experience, - efficient in the whole and all its parts guaranteed with regard to capacity and return by deferred payment re-erected at your place not by mere Factory Fitters but by real Expert Engineers who not only supervise the erection work but also can give - immense and invaluable assistance in the management of the Factory.

Moreover all the auxiliary machines as well as most of the preparatory machines will be absolutely New.

With regard to the terms of payment as already mentioned to you, it will be possible to utilise the blocked Reichs mark account of the Government of Mysore in Germany for the payment of parts of the second and the last instalments.

I sincerely hope that all these facts pointed out above may convince you that our proposal is the most economical one and that therefore your final decision will be made in favour of the same.

Sincerely yours,

F. Isermann

2 draft

My dear Sir,

I am desired to state that Government are desirous of having the benefit of your valuable services in connection with the establishment of the Mysore Silk Waste and to send herewith for your information a copy of the G.O. which is being issued in regard to the formation of Mysore Silk Waste Spinning Factory Limited. Govt They are anxious that you should be the Chairman of the provisional Directorate and they will be glad if you will kindly agree to the proposal.

Yours sincerely,

OFFICE OF THE DIRECTOR,

Dated Bangalore, 14th Septr. 1935

Seri 107-33-18

FROM S. Abdul Wajid, Esq., B.A.,
Director of Industries and Commerce in Mysore,
Bangalore (India).

To

M. Venkatanaranappa, Esq., B.A.,
Secretary to the Government of Mysore,
Development Department, Bangalore.

SIR,

I have the honor to state that the scheme for establishing a Silk Waste Spinning Factory is being examined in details as suggested in your D. O. letter No. D. 7418/Seri. 107-33 dated the 11th May 1935.

An informal discussion was held on the 12th instant with Rajasabhabushana Dewan Bahadur K. R. Srinivasiengar and Messrs. Subba Rama Chetty & Narain Rao Naik about the estimate received from Japan and the conclusion arrived at was that the scheme will pay only if it is worked double shift.

It was decided to await the result of the experiment of spinning 200 lbs of Charka Waste that has been sent to Messrs. Greenwood and Batley in England and find out if the higher yield of yarn(our) waste had given in laboratory tests would tally if the waste is put on the machines we intend installing.

I hope to get the results in about a fortnight's time when I shall have another consultation with the Gentlemen named above and come to a definite finding.

In any case, I do not think that Mr. Shamsuddin Khan's deputation would be necessary as I propose to withhold a part of the payment for the plant until the working shows that all that they claimed for it has been actually demonstrated.

I have the honor to be,
Sir,
Your most obedient servant,
S. Abdul Wajid.
Director.
